

PROPOSAL · PREPARED FOR HARINA BAKESHOPPE

YOUR OWN ORDERING SYSTEM. ZERO COMMISSION.

A complete online pre-order and pickup platform, built around your Square POS and your kitchen's real rules. Keep 96.4 cents on every dollar, turn your walk-in traffic into customers you can actually reach — and own the whole thing outright.

96.4%

of every order stays with you

3.5

orders/week to break even

100%

of the customer list is yours

\$69

total monthly running cost

THREE LEAKS, ONE FIX

Party trays are your highest-ticket product — \$20 to \$65 each. That's exactly where a percentage-based commission hurts most, and exactly where manual order-taking costs the most staff time.

1 · COMMISSION

You already partner with Uber Eats and DoorDash. Every order that flows through them is revenue you generated, taxed at **15–30%**. On a \$45 tray that's **\$6.75–\$13.50** gone before flour.

2 · STAFF TIME

Every phone order takes roughly **5 minutes** — answer, write it down, confirm the date, chase payment. During service, that's your busiest person standing still.

3 · ANONYMOUS CUSTOMERS

Every walk-in leaves without a trace — no email, no history, no way to bring them back. Calls after 9 PM never happen at all, and uncollected trays are baked for nothing.

The platforms own your customer, too. On a marketplace, the customer's email, order history and reorder habit belong to the platform — not to you. Direct ordering makes that list yours, permanently.

THE MATH ON A \$40.63 AVERAGE TRAY ORDER

WHAT YOU KEEP

\$39.15

Direct on your own site

Square fee: \$1.48

\$34.53

Marketplace at 15%

Commission: \$6.09

\$28.44

Marketplace at 30%

Commission: \$12.19

Direct ordering saves **\$4.62 to \$10.71 on every single order** — 11.4% to 26.4% of revenue, straight to the bottom line.

ANNUAL IMPACT

COMMISSION AVOIDED, BY VOLUME

Pick the row that matches where you expect to land. Every figure is annual, net of Square's 2.9% + 30¢ online processing fee.

DIRECT ORDERS / WEEK	ANNUAL SALES	VS 15%	VS 25%	VS 30%
5	\$10,563	\$1,200	\$2,256	\$2,784
10	\$21,125	\$2,400	\$4,513	\$5,569
20	\$42,250	\$4,800	\$9,025	\$11,138
40	\$84,500	\$9,601	\$18,051	\$22,276
75	\$158,438	\$18,001	\$33,845	\$41,767

PLUS WHAT COMMISSION MATH DOESN'T CAPTURE

RECOVERED	20 ORDERS/WK	40 ORDERS/WK
Staff time on manual order-taking (5 min @ \$20/hr loaded)	\$1,733	\$3,467
No-show / uncollected trays (3% — eliminated by prepay)	\$1,268	\$2,536
Total annual value vs a 15% marketplace	\$7,802	\$15,604
Total annual value vs a 25% marketplace	\$12,027	\$24,055

Break-even is 3.5 orders per week. The platform's entire running cost is \$69/month — hosting, database, email and text messaging combined. Everything above roughly one order every other day is profit you weren't keeping before.

THE ASSET YOU ALREADY HAVE

YOUR BEST CUSTOMERS ARE ALREADY IN THE SHOP

You have heavy walk-in traffic. Every one of those people cost you nothing to acquire — and right now, every one of them walks out anonymous. No email. No order history. No way to tell them about the Christmas tray menu.

TODAY

A customer buys pandesal, pays, leaves. You'll probably never know if they come back, and you have no way to reach them if they don't.

ON A MARKETPLACE

Worse. The platform keeps the customer relationship *and* takes 15–30%. You're renting access to people who ate your bread.

WITH REWARDS

"Want \$10 off? Join our rewards program." They scan, enter an email, and become a customer you can reach for free, forever.

THE TRADE NOBODY TALKS ABOUT

The rewards program costs about **10% back to the customer** — 100 points earns \$10 off. Put that next to a marketplace commission on the same \$1,000 of sales:

WHERE THE SALE HAPPENS	WHAT IT COSTS YOU	YOU KEEP	AND YOU GET...
Your site + rewards	\$36 Square + \$100 rewards	\$864	A customer who comes back
Marketplace @ 15%	\$150 commission	\$850	Nothing you keep

WHERE THE SALE HAPPENS	WHAT IT COSTS YOU	YOU KEEP	AND YOU GET...
Marketplace @ 25%	\$250 commission	\$750	Nothing you keep
Marketplace @ 30%	\$300 commission	\$700	Nothing you keep

Read the first two rows again. Even after paying your own customers 10% back, you keep more than the cheapest marketplace tier — and that \$100 went to the person who eats your bread, not to a platform. One of those buys loyalty. The other buys nothing.

HOW FAST A LIST BUILDS FROM FOOT TRAFFIC

WALK-INS PER DAY	TRANSACTIONS/YR	MEMBERS AFTER 1 YR AT 3% SIGNUP	AT 6%	AT 10%
50	18,250	137	274	456
100	36,500	274	548	913
200	73,000	548	1,095	1,825
300	109,500	821	1,643	2,738

Assumes a regular visits roughly four times a year, so unique people $\approx$ transactions $\div$ 4.

WHAT THAT LIST IS WORTH ONCE YOU CAN EMAIL IT

REWARDS MEMBERS	+1 TRAY ORDER EACH/YR	+2 ORDERS	+3 ORDERS
250	\$8,776	\$17,552	\$26,328
500	\$17,552	\$35,104	\$52,656
1,000	\$35,104	\$70,209	\$105,313

REWARDS MEMBERS	+1 TRAY ORDER EACH/YR	+2 ORDERS	+3 ORDERS
2,000	\$70,209	\$140,417	\$210,626

Net of Square processing and the full 10% reward cost, at your \$40.63 average tray order. This is revenue you currently have no way to ask for — reaching the whole list costs nothing beyond the \$69/month already in the plan.

You control the dial. The reward rate is a setting, not a law: 100 points for \$10 is 10% back, 150 points is 6.7%, 200 points is 5%. Start generous to build the list, tighten it once they're regulars.

BUILT TO YOUR BRIEF

YOUR NINE QUESTIONS, ANSWERED IN CODE

Your requirements document asked nine specific questions. Each one is a working, tested feature — not a roadmap item.

✓ **1. How will we know an order came in?**

Six ways at once: Square POS, staff dashboard with an audible chime, email, text message, plus Discord, Slack or Trello if you want them.

✓ **2. Does a new order notify automatically?**

Yes. The kitchen screen updates live and chimes. No refreshing, no checking.

✓ **3. How do staff know it's paid?**

Every order is paid before it's confirmed. A PAID badge and the Square payment ID sit on every card. Unpaid carts never reach the kitchen.

✓ **4. Separate order statuses?**

New → Paid → Preparing → Ready for Pickup → Completed, plus Cancelled. One tap each, and it mirrors into Square.

✓ **5. Where do orders appear?**

Dashboard, email, text, and Square POS — and the dashboard works on a phone behind the counter.

✓ **6. Notification on every paid order?**

Email and text fire the moment payment clears — never on an abandoned cart.

✓ **7. Can customers choose pickup date and time?**

Required before the pay button will even enable. No order arrives without a slot.

✓ **8. Block Ensaymada orders after the 6 PM cutoff?**

Enforced on the server in your store's local time. Past cutoff, tomorrow disappears from the calendar automatically.

✓ **9. Cap orders per pickup time?**

Per-slot caps and per-day production limits, both editable by staff. Full slots grey out. The kitchen can never be over-committed.

Beyond the brief

Customer accounts, a rewards program, tipping, Apple Pay, refunds without leaving the dashboard, multi-location and accounting export were all listed as "out of scope" originally. They're built.

COMPLETE FEATURE INVENTORY

EVERYTHING IN THE BOX

Twenty-one customer and staff screens, nineteen database tables, five integrations — all working today.

STOREFRONT

- Branded homepage, menu page and product pages
- Photography pulled straight from Square
- Allergen and dietary labels with shared-kitchen disclaimer
- Live "sold out at this location" per size
- Cart that survives closing the tab
- Works on any phone, tablet or desktop
- Screen-reader accessible, keyboard navigable

PICKUP SCHEDULING

- Per-product lead times and order cutoffs
- Everything computed in store-local time
- Mixed carts resolve to the times all items allow
- Per-slot and per-day capacity caps
- Holiday and closure dates
- Slots held for 10 minutes during checkout
- Race-proof: two customers can't take the last slot

PAYMENTS

- Card, Apple Pay, Google Pay, Cash App Pay
- Optional tipping at checkout
- Card details never touch our servers
- Duplicate-charge protection on every attempt
- Automatic recovery if a payment result is ever unclear
- Full and partial refunds from the dashboard

- Square stays your system of record

KITCHEN DASHBOARD

- Live order queue with new-order chime
- One-tap status changes that mirror to Square
- Prep timeline grouped by pickup time
- Printable per-day prep sheets
- QR pickup-pass verification at the counter
- "In checkout right now" visibility
- Filter by location; works on a phone

STAFF CONTROLS

- Pause online ordering with one tap
- Mark an item sold out for today only
- Edit lead times, cutoffs, pickup times, caps
- Closure dates and per-slot limits
- Re-sync the Square catalog on demand
- Staff roster with initials on every action
- Full audit log of who changed what

CUSTOMER NOTIFICATIONS

- Branded HTML confirmation emails
- Optional order text messages (opt-in, CASL-compliant)
- "Your order is ready" alerts
- Morning-of pickup reminders
- Refund and cancellation notices
- Add-to-calendar link on every order
- Every send logged — "we never got it" is answerable

CUSTOMER ACCOUNTS

- Passwordless email sign-in
- Order history and one-tap reorder

- Reorder pre-checks what's still available
- Rewards: 100 points earns \$10 off
- Points reverse automatically on refunds
- Guest checkout still fully supported

BUSINESS INTELLIGENCE

- Revenue by day, week, custom range
- Busiest weekdays and pickup times
- **Marketplace fees avoided** — tracked live
- Rewards program performance
- Accounting CSV for QuickBooks, Xero, Wave
- Closed-order export with full filters

OPERATIONS & TRUST

- Multi-location with per-branch hours and inventory
 - Nearest-store recommendation
 - Privacy policy, terms, refund policy
 - Search-engine ready; installable as a phone app
 - Automatic error alerting
 - Customer data auto-anonymized on a retention schedule
 - Self-healing background jobs every 5 minutes
-

WHY THIS WON'T BREAK ON A SATURDAY

BUILT LIKE PAYMENT SOFTWARE, BECAUSE IT IS

470

automated tests, run on every change

28,900

lines of production code

0

known defects at handover

MONEY CAN'T GO WRONG QUIETLY

Every payment carries a one-time key, so a double-click or a flaky connection can't charge twice. If a payment result is ever ambiguous, the system recovers it automatically instead of guessing.

TESTED AGAINST REAL CONDITIONS

The scheduling and capacity logic is verified against a real database with concurrent customers competing for the last slot — and every test runs in a deliberately hostile timezone to catch date bugs.

KEEPS WORKING WHEN THINGS FAIL

If Square goes down, the kitchen screen keeps working and reconciles afterwards. If an email fails, it retries on its own. A notification problem can never fail a payment that already succeeded.

THE PART THAT COMPOUNDS

YOU OWN IT. THAT'S THE WHOLE POINT.

Everything else in this document is a number that changes year to year. This one doesn't: at the end of it, you hold an asset instead of a subscription to somebody else's.

WHAT'S YOURS

- The software itself — source code and all
- Your customer list, exportable any time
- Every order, every reward balance, every trend
- Your storefront, your brand, your photography
- Which trays sell, on which days, at which store
- The right to change any rule without asking anyone

WHAT A PLATFORM KEEPS

- The customer — their email is not yours to use
- The commission rate, which they set, not you
- Your placement in search, next to competitors
- The data on who buys what and when
- The relationship, if you ever leave the platform
- The ability to change the deal with notice

\$215K+

what this system costs to build from scratch — on your balance sheet, not rented

0%

of your direct sales that anyone else can claim, now or after a rate change

YOURS

the list, the data and the software transfer with the business if you ever sell it

A bakery that rents its customer relationships has revenue. A bakery that owns them has a business that keeps working when a platform changes its terms — and something real to hand to whoever comes next.

REPLACEMENT COST

WHAT BUILDING THIS FROM SCRATCH COSTS

This is a genuine estimate of the effort in the delivered system, priced at standard North American development rates.

WORK PACKAGE	HOURS
Discovery, requirements, information architecture	50–80
Design system, brand, responsive interface	70–110
Storefront: catalog, product pages, menu, cart	90–130
Pickup scheduling engine (lead times, cutoffs, capacity)	80–120
Checkout and Square payments (card + 3 wallets, tips)	130–190
Webhooks, refund ledger, reconciliation	90–140
Kitchen dashboard: live queue, statuses, prep sheets	110–160
Notifications: 8 channels, retries, reminders	70–100
Admin: product rules, capacity, sold-out, pause, settings	70–100
Accounts, passwordless sign-in, rewards, reorder	70–110
Analytics, accounting export, audit log	55–80
Multi-location support	40–70
Automated test suite (470 tests)	110–170
Deployment, monitoring, security hardening	45–70
Legal pages, search optimization, accessibility	30–50

WORK PACKAGE	HOURS
Quality assurance, documentation, handover	50–80
Total	1,160–1,760 hours

IF YOU COMMISSIONED THIS TODAY	RATE	PROJECT COST
Offshore / junior freelance	\$65/hr	\$75,000 – \$114,000
Senior freelance (North America)	\$125/hr	\$145,000 – \$220,000
Boutique agency — the realistic comparison	\$185/hr	\$215,000 – \$326,000
Mid-size agency	\$265/hr	\$307,000 – \$466,000

The system already exists, tested and deployed. You aren't funding an 8-month build with the risk that comes with it — you're acquiring a finished asset. That's why the pricing below is a fraction of the figures above.

YOUR OPTIONS

THREE WAYS TO OWN IT

OPTION A

BUY IT OUTRIGHT

\$16,500

one-time · you own the code

- ✓ Full source code and ownership transfer
- ✓ Deployed to your accounts
- ✓ Staff training session
- ✓ 30 days of launch support
- ✓ No monthly fee to us, ever
- ✓ You pay ~\$69/mo infrastructure directly

Best if you want the asset on your balance sheet and have someone technical to call.

OPTION B · RECOMMENDED

LAUNCH & CARE PLAN

\$7,500

setup + \$295/month

- ✓ Everything in Option A
- ✓ We host, monitor and maintain it
- ✓ Security patches and platform updates
- ✓ Square API changes handled for you
- ✓ Infrastructure costs included
- ✓ Menu and rule changes on request
- ✓ Ownership transfers after 12 months

Best if you want it to simply work without thinking about it.

OPTION C

FULLY MANAGED

\$2,500

setup + \$495/month

- ✓ Everything in Option B
- ✓ Lowest possible upfront cost
- ✓ Priority support
- ✓ Quarterly performance review
- ✓ New features as they're built
- ✓ Cancel with 60 days' notice

Best if you'd rather protect cash flow and treat it as a monthly operating cost.

HOW FAST EACH OPTION PAYS FOR ITSELF

OPTION	20 ORDERS/WK VS 15%	40 ORDERS/WK VS 15%	40 ORDERS/WK VS 25%	75 ORDERS/WK VS 25%
A · Buy outright	25 months	13 months	8 months	4 months
B · Launch & care	21 months	7.5 months	4.4 months	2.2 months
C · Fully managed	16 months	3.1 months	1.7 months	0.8 months

THREE-YEAR PICTURE AT 40 ORDERS PER WEEK

Sales through your own site over 3 years	\$253,531
What a 15% marketplace would have taken from it	\$38,030

What a 25% marketplace would have taken from it	\$63,383
What a 30% marketplace would have taken from it	\$76,059
Total 3-year cost of this platform (Option B, all-in)	\$20,604

Read that last table twice. Over three years the platform costs less than a third of what a single marketplace would have taken in commission on the same sales — and at the end of it, the customer list, the ordering data and the software are yours.

FROM HERE TO YOUR FIRST ONLINE ORDER

WEEK 1 · CONNECT

- Point the system at your live Square account
- Confirm lead times and cutoffs per product
- Load allergen and dietary information
- Set pickup capacity per slot

WEEK 2 · REHEARSE

- Test orders end to end with real cards
- Train staff on the kitchen dashboard
- Set notification recipients
- Connect your domain and enable Apple Pay

WEEK 3 · LAUNCH

- Go live and announce to your customers
- **Counter cards: "Join rewards, get \$10 off"**
- Every walk-in becomes a chance to build the list
- Watch the fees-avoided counter start climbing
- Tune capacity and reward rate on real demand

A working demonstration is ready now. The complete system — storefront, checkout, kitchen dashboard, analytics — can be walked through end to end before you commit to anything.

HARINA BAKESHOPPE

Online pre-order & pickup platform · Proposal prepared 2026

Commission rates shown are typical published marketplace rates and should be confirmed against your own agreements. Square processing is quoted at its published Canadian online rate of 2.9% + \$0.30. Savings figures are calculated on a \$40.63 average order value derived from your current tray pricing, and scale with your actual volume.
